## *Projects*

---

- **Fiasco bot** - is a bot for Kaspi customers, with which you can track price changes through a graphical interface. The bot gives customers the opportunity to track their favorite products and makes it clear which seller made fake discounts. In the future, we plan to create our own trading platform where we will hold every price of every product for every day or hour that has passed and control inflation
- The **smart home system** based on microcontrollers, which can be controlled via a website, telegram bot. Control of lighting, ventilation, heat supply. A safe mode has been added that notifies the owner of the presence of guests in the yard, an alarm is triggered in case of a fire or gas leak, and so on. The whole point of the project is aimed at the security of each client and makes it possible to manage the system remotely
- **Laundro net** - our startup is a project for the automation of household devices for the provision of vending services
